People and Business*

Chamber History

Three Rivers' rich commercial history dates to 1829 when the Three Rivers Manufacturing Co. established a new textile mill on Springfield Street. Our village has always been proud and supportive of its businesses, and the first Chamber was organized in 1917. The members played an important role in developing new businesses in the area and even offered local support to an emerging manufacturing business in 1939 by buying shares of its stock. As more businesses turned to the Chamber for support, the Chamber officially incorporated in 1940. The original members stated that the purpose of the Chamber was "To establish a body of recognized authority to deal with matters of interest to the businessmen of Three Rivers and to the general public; to forward the prosperity of the community; and to promote the general welfare of the village."

Today, members strive to fulfill the goals set by the original members of the Chamber by improving the village through its support of local businesses and community development. Throughout the year we proudly sponsor community beautification efforts, public service initiatives, and family recreational events.
